Effective Project Delivery

Integrate Agility into Project Management

The world has changed !

Of the Fortune 500 companies in 1955, 89% are gone. Everything is too BIG, changing too FAST and too Complex.

Only 30% of organization change initiatives met its initial strategic intent. More than 50% of software features developed were not used.

WHY so much wastage of resources and time?In today's highly challenging business environment, many companies are running projects in order to respond to rapid changes in economy, technology and political environment.

Learn how to change your current project delivery method to a more adaptive approach. Gain hands on experience from the hands-on exercises !
